

## VII— 3. Grinders

1. Is the grinder suited to the work done?
2. Is the grindstone undamaged?
3. Are grindstones changed by a qualified person?
4. Is there a protective cover?
5. Are workers wearing dustproof goggles and a dust mask?
6. Are grinders run without grinding for one minute before use to check that they are in proper condition?
7. Are the flexible cables and plugs undamaged?
8. Do plugs have a grounder?
