

## VII — 4. Impact wrenches

1. Is the wrench spinning idly or going in reverse?
2. Are beams clear of scattered bolts?  
Are bolts stored in boxes?
3. Are high-tension bolts used as temporary bolts?
4. Are workers using a full harness?
5. Are flexible cables pulled forcefully?
6. Are flexible cables undamaged?
7. Is the grounding system adequate?
8. Do the sizes of nuts and the wrench match?
9. Is the area underneath work performed above clear of people?
