

IX Preventing Work-related Illness

IX – 1 . Working with organic solvents

1. Have paints with minimal hazardous properties been chosen?
2. Are you aware of the hazardous properties of materials?
3. Is work conducted based on work procedures under the direction of an operations leader?
4. Are you using a gas mask?
5. Is the area near the worksite free of flame?
6. Is there adequate ventilation?
7. Have workers been properly trained to work with organic solvents?
8. Are there proper measures in place to prevent the theft of empty containers?
